NOTES FROM 2023 NCAA TOURNAMENT

In the 2023 NCAAT, Northwestern (-8), Kansas State (-8), Missouri (-13), and Miami (-13) were 8 or more spots "too high" from their expected S-Curve position. All four won in the Round of 64, with Missouri and Northwestern losing in the second round. Kansas State lost in the Elite Eight to FAU and Miami reached the Final Four.

Texas A&M (+9), Arkansas (+9), West Virginia (+9), and Utah State (+12) were slotted 8 or more S-Curve spots "below" their expected positioning. Arkansas was the only team to advance beyond the Round of 64, reaching the Sweet 16 where they lost to UConn. Last year, FAU was +6 on their way to the Final Four.

S-Difference is equal to the actual S-Curve ranking minus the expected S-Curve ranking.
 Expected S-Curve ranking is equal to average ranking excluding the MINIMUM and MAXIMUM ranking amongst the six computer ranking systems.
 Teams with a positive S-Diff were placed on the S-Curve below in a worse than expected place, while teams with a negative S-Diff were placed in a better than expected S-Curve position.

Conference Rankings - Efficiency

The average adjusted efficiency margin of all teams that finish in the 25th-75th percentile within the conference.

Example: Pac-12 has 12 teams, take the average adjusted efficiency margin of teams of w/ an adj.EM of 3rd through 9th in the conference. Rounding up to nearest whole number for "better team" and down for "worse team", ie: 10-team league takes average of 3rd through 7th.

Conference Tiers

Using the adjusted efficiency margin established for each conference an average value was established. After which, six conference tiers were established for each season using methodology that compares the conference's metrics against an adjusted average using the standard deviation found from the yearly numbers.
